SOME FIGURES I

It is said it takes 20,649 stitches to make a shirt. To make a stylish dress it takes 422,695 stitches, not counting the stitches in the side when being worn. How many stitches it takes to make over a young lady into an old maid we know not; and it would be worth a fellow's life to try and find out. It's risky work fooling around old maids with questions. One of the cases and commonest ways of frittering away money is in the purchase of Soap.

It is a big mistake to imagine that because AN ARM-FULLOF SO AP can be brught FOR 25c. that the investment is a good one. It is meney wated, because cheap Soap are rank in quality, ruinous to the hands and dothes and last no height of time. If the wattly different with "SUMLIGHT SOAP" the ugh 25c buys less in bulk, yet the value is there. It was a further, saves labor, fuel, washing power, the clothes and skin; can be used for every purpose in the house, and will do what no other soap can do. Hence it is really the cheapest in the end. A trial will convince you.

TWO ROWED BARLBY.

The Oshaw Fudicator remarks—
"These farmers we make the covered bar"These farmers we make the covered baring his farmers we make the covered baring his farmers we make the covered baring his farmers we formed for the covered barter as the result of that preference. Good
grab burper are offering 60 cents per bankfor 56 pounds two-rowed barley, and
have received searers hundred banklas for
abligment. Two car lots were sent forward
from Brocklin last wesk and the prospects
are good for other large shipments. If our
farmers find that the two-rowed barley
pays batter in the English market than
six-rowed would in the United States market they will have Mr. McKitaley to thank
for the Barley raising ja not the most profishels work for our farmers, and they arebecoming aware of the Statistics from the
Ontarlo Bureau of Industries show thas a
restart energe of coarser grains, such as are
used for feed, is grown than in former years,
while the acreage for harly is greatly fullonoff. Then there is a great increase in live
took and choses making. These facts show
that a great change is in progress and that
barley has had the day.

THE MONEY'S THERE

One of the casiest and commonest ways of frittering away money is in the purchase of Soap.

It is a big mistake to imagine that because AN ARM-FUL OF SOAP can be brught FOR 25c. that the investment is a good one. It is money wasted, because cheap Soap's are rank in quality, ruinous to the hands and clothes and last no length of time.

If low vastly different with "SUNLIGHT SOAP" lively 125c buys less in bulk, yet the value is there. It goes further, saves labor, fuel, washing power, the clothes and skin; can be used for every purpose in the house, and will do what no other soap can do. Hence it is really the cheapest in the end. A trial will convince you.
